## Profile Summary

A detail-oriented IT professional with 2 years of experience in web development, holding a **B.Sc. in Information Technology** from **E. B. Madhavi College**. Skilled in building responsive and functional web applications, with hands-on experience across multiple projects including a preschool website, a collaboration platform (final-year project), and practice applications like a file converter, chatbot, and tic-tac-toe game. Experience working on live projects at **Bannerspot** strengthened my technical abilities and understanding of real-world development environments.

## Work Experience

### Application Developer – JG BizSolutions Pvt Ltd, Naupada, August 2024 – Current

At JG BizSolutions Pvt. Ltd., I play a key role in the development, maintenance, and enhancement of the company's core application, Time-O-Logy. My responsibilities include building new features, optimizing existing modules, and ensuring seamless system performance. I work with a diverse technology stack including HTML, CSS, JavaScript, C, C++, C#, Java, React JS, Node JS, PHP, ASP.NET MVC, MySQL, MS SQL, and MongoDB, allowing me to contribute across both frontend and backend environments.

In addition to development, I provide technical and IT support, helping resolve system-level issues, assisting users, and ensuring that software and infrastructure operate smoothly. This role has strengthened my ability to troubleshoot efficiently, collaborate with cross-functional teams, and deliver scalable solutions. Working on Time-O-Logy has also enhanced my understanding of real-world software workflows, version control, deployment processes, and performance optimization, helping me grow as a versatile and solution-oriented IT professional.

### Web Developer - Banner Spot, Dombivli, April 2023 – July 2024

Developed and managed websites including **kelplanet.com**, **vacationzvista.com**, and **thestarkidsschool.com**, focusing on improving functionality, user experience, and deployment efficiency. This experience involved working on real-world requirements, implementing responsive designs, integrating backend functionality, and ensuring smooth hosting and maintenance. Throughout these projects, I gained practical experience in troubleshooting issues, refining performance, and delivering reliable, production-ready web solutions.

## Academic Project

### WEBXDESIGNO

**Tools:** HTML, CSS, JavaScript, PHP, MySQL.

**Roles:** Full-Stack web application, Deployment

**Description:** **WebX Designo** is a web platform designed for both customers and freelance designers, offering features to simplify hiring, designing, and project execution. The platform includes three main sections: **Templates, Designers, and Tools**. Templates provide ready-made designs to help designers work faster and maintain consistency. The Designers section connects clients with freelancers, enabling them to request work and process payments securely. The Tools section offers essential utilities such as a Background Remover, Gradient Generator, Color Generator, QR Code Generator, and Image Enhancer to speed up common design tasks. Together, these features create an efficient ecosystem that supports seamless design workflow and collaboration.
